

THE POWER OF SURFACE.

ORIGINAL
MELDORFER®

Facing bricks handmade in Germany

ORIGINAL MELDORFER

NORDIC BY NATURE

At its location in Schleswig-Holstein, far in the north of Germany, the Original Meldorfer® factory has been producing high-quality, handmade facing bricks since 1979. Made from natural sands, ground stones and mineral fillers, they offer countless possibilities for authentic and creative façade design. Whether in shape, color or texture – Original Meldorfer® can be individually adapted, giving buildings individuality and character. They are also durable, weather-resistant and particularly economical. This means that ambitious projects can be realized with Original Meldorfer®, even when budgets are tight.

MY MELDORFER

Inspiration for individual designs	77
------------------------------------	----

SERVICE

88

NATURALLY STRONG. NATURALLY BEAUTIFUL.

BEAUTIFUL

Original Meldorf® are handcrafted with great attention to detail. With almost unlimited design options, facing bricks can be created in any style, color and format exactly as desired.

- For a unique look
- Designed for flexible use on façades and interior surfaces
- From ETICS to monolithic construction and monument preservation
- Possibility of individual design with My Meldorf®

SUSTAINABLE

With the increasing scarcity of raw materials and a warming climate, it is now more important than ever to use sustainable building materials.

Original Meldorf® are made from approx. 90 % natural sands and minerals. In addition, Original Meldorf® in ETICS are certified with the Blue Angel, as they are produced without biocides.

- Environmentally conscious lightweights
- Up to 60 % smaller CO₂ footprint compared to clinker brick slips

NATURALLY STRONG. NATURALLY BEAUTIFUL.

ECONOMICAL

With a weight of 5 kg/m² they are approx. 80% lighter than clinker brick slips and therefore much more efficient and easier to install. The bottom line is that they are up to 25% faster to apply than their clinker counterparts. Time-saving application thanks to the following advantages in the system:

- No complex dowelling or heavy bonding required
- No field boundary joints necessary
- Bonding and grouting possible with one material

DURABLE

Surfaces designed with Original Meldorf® are highly resistant to cracks, frost, algae and fungal attack as well as UV radiation. They are also non-combustible, making them a safe choice for any project.

- Particularly resistant and robust
- For durable surfaces of lasting value
- More security for your projects

MADE TO MEASURE - HANDMADE QUALITY

Individuality and handmade quality are the credo of Original Meldorf®. At the same time, the lightweight tiles, which are just 4 to 6 mm thick, set high standards in terms of form and function. They are just as resistant and durable as solid bricks and brick slips.

While the raw material is produced by machine, the surfaces are given their individual finishing touches by hand using traditional methods. Around 90 % of the facing bricks consist of natural sands, ground stones, high-quality mineral fillers and binding agents. The result is a particularly robust, impact-resistant and easy-to-clean material that opens up almost unlimited possibilities for architects, planners and builders when designing façades and interiors.

HIGHEST STANDARDS

The consistent quality of the particularly lightweight material is the result of high standards in development and production. Intensive research, years of experience and tried and tested compositions make it possible.

ORIGINAL MELDORFER®

URBAN CLASSIC

URBAN CLASSIC

Traditional clinker brick looks

Classic colors and shapes for the design of long-lasting façades in the clinker brick looks that are particularly popular in northern Germany – for every detail of the façade.

NEW DESIGN

NEW DESIGN

New views and perspectives

Larger formats, elongated shapes, varying joint patterns – all according to the wishes of architects, planners and building owners.

MY MELDORFER

MY MELDORFER

Nothing is impossible

Unlimited possibilities for playing with colors, formats and joint patterns – according to individual planning.

Surface texture 1:1

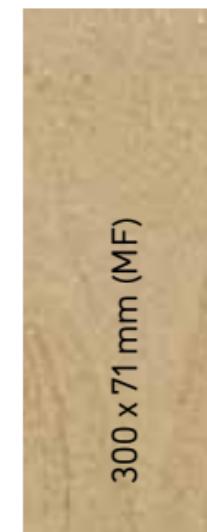

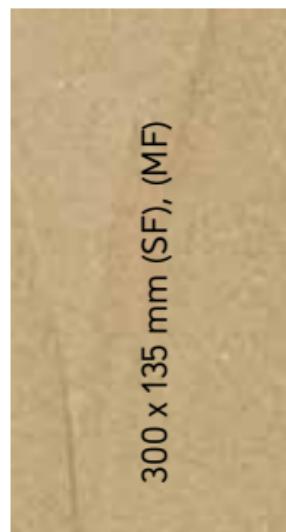

NEW DESIGN Holstein

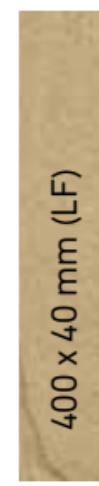

FORMATS

Original Meldorfers® are produced in different formats. The shape of the handmade veneers is variable, and completely individual special shapes are also possible (see My Meldorfers).

Special and multi-formats

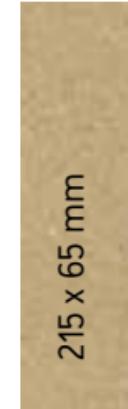

Long formats

Normal and thin formats

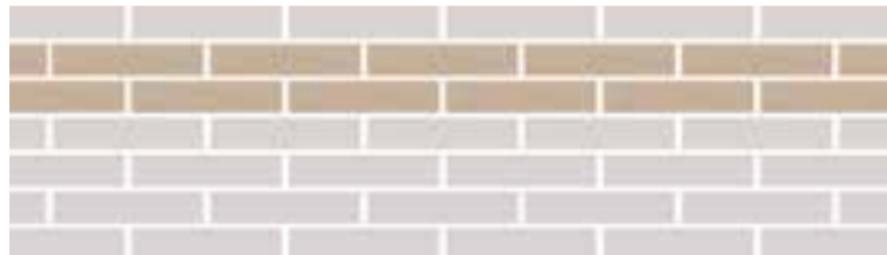

Example of other formats

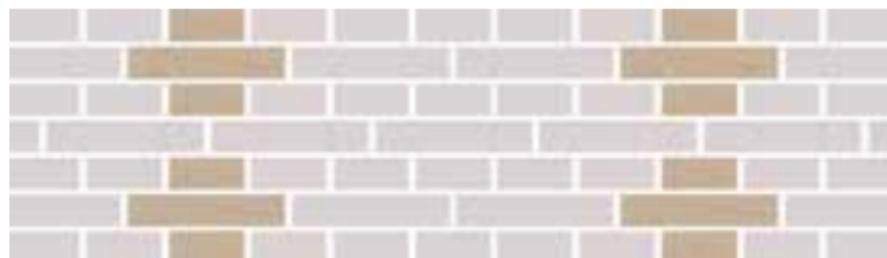

LAYING TYPES

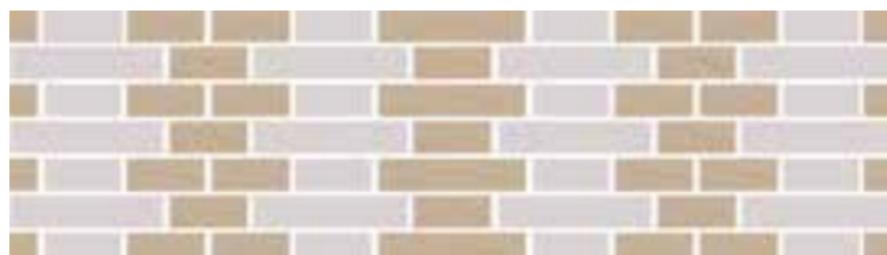

The different formats and the way they are arranged have a decisive influence on the final look.

Running bond

English cross bond

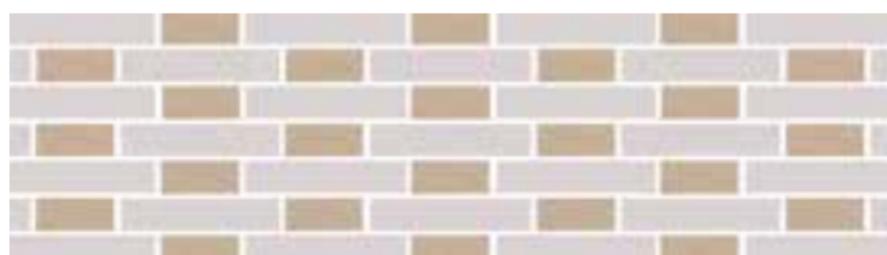

Block bond

Dutch bond

Wild bond

Flemish bond

JOINTS

The right choice of joint color is crucial for a perfect surface with joints. It is selected to match the standard patterns. Special colors are also possible according to individual wishes.

Capatect Meldorf Ansatzmörtel 080

Mortar for bonding the facing bricks and for grouting the joints.

Standard colors (special colors on request)

Sand white

Cement gray

Anthracite

Capatect Meldorf Fugenmörtel 081

For additional full grouting. Special color shades on request.

Gray

Seamless in the interior

For a particularly calm look, seamless flooring can also be laid indoors.

Example: Urban Classic Oslo seamless

EXPOSED MASONRY LOOK – FOR EVERY DETAIL OF THE FAÇADE

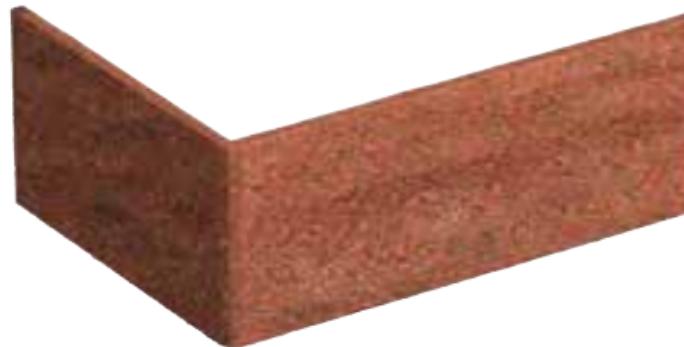

Original Meldorf® offer versatile and economical façades with a natural clinker brick look for monolithic construction methods. The natural, lively surface of the facing bricks gives façades a striking and high-quality appearance.

Almost any clinker format is possible with Original Meldorf®. They enable the prefabrication of complete building elements and almost any color can be created true to the original. Original Meldorf® in a traditional clinker brick look guarantee a natural appearance in every case. At the same time, they enable a creative play of colors and are practically indistinguishable from conventionally fired clinker bricks. And this applies to all details of the façade, because the exposed brickwork look is perfected by corner facing bricks, which round off the harmonious overall appearance and bring out the character of solid bricks to optimum effect.

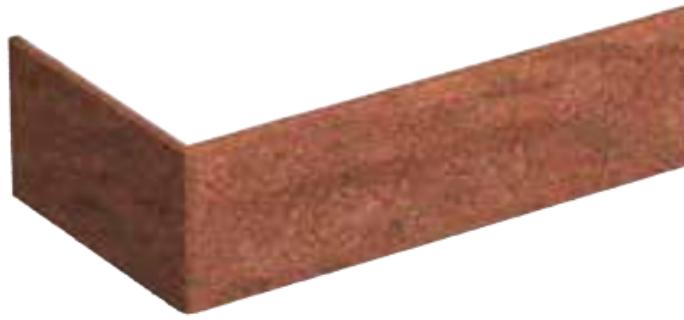

FORMATS FOR THE CORNER FACING BRICKS AS 3/4

Format	Dimensions
Thin format (DF)	175 x 115 x 52 mm
Standard format (NF)	175 x 115 x 71 mm

Variant 2: Original Meldorf® Holstein in combination with 3D Papaya 35, 3D Palazzo 70

Variant 3: Original Meldorf®[®], Steingrau in combination with 3D Curcuma 25, 3D Palazzo 70

ROOMS WITH CHARACTER – SIMPLY DIFFERENT

Rooms with their very own, unmistakable style – they can be perfectly designed with Original Meldorf®. Colors, shapes and textures – from cool Nordic to vivid Mediterranean designs. The variety of facing bricks makes them a real alternative to classic textile wall coverings and plasters.

Original Meldorf® can be applied easily and extremely economically to almost any surface. This makes them ideal for the sophisticated design of interiors. Particularly advantageous is their comparatively low weight of only approx. 5 kilograms per square meter. This means that Original Meldorf® can also be used reliably on light-weight walls. Rustic clinker brick looks are in vogue – for lobbies, showrooms or even private rooms with individual flair. The surfaces also withstand constant high mechanical loads in heavily frequented rooms and retain their flawless appearance for a long time.

MY MELDORFER

NOTHING IS IMPOSSIBLE

MY MELDORFER

EVERYTHING IS INDIVIDUAL

We see design freedom as a benchmark that we are constantly changing through our joint work with architects, planners and clients.

It's our mission to constantly expand the enormous design spectrum of facing bricks and to explore unconventional paths so that even unusual solutions can be implemented. Because the fact is: like almost no other material, Original Meldorfer® offers the possibility of realizing differentiated design concepts inside and out in consistently high quality.

In terms of design, they leave virtually nothing to be desired: A wide variety of formats and format combinations is possible, which are created according to the planner's specifications using a shape grid. The spectrum ranges from special reliefs, organic and amorphous shapes, polygons and ellipses to complex artistic design solutions for façades and rooms.

MY MELDORFER

SELECT DESIRED COLOR

Thanks to our coloristic specialists, we can create the individual color shade according to your specifications. Designs from the standard collections or completely new color schemes – anything is possible with My Meldorfer.

MY MELDORFER

VARIATIONS IN FORM

Min. dimensions: 40 x 40 mm;

Max. dimensions: 300 x 600 mm

Create your own shape – round or cornered.

Specially created templates then serve as a model for your own My Meldorfer.

MY MELDORFER

CHOOSE THE RIGHT SURFACE

e.g. mica effects, sands, graining

Give the surface an individual character: mica effects, sands in different sizes and shades, graining or even complementary colors are possible.
